

Below are user-centric user stories written from the perspective of the real actors in your system (Collector, Ticante, and Admin/Owner).

They follow the classic User Story format used in Agile:

As a [user] I want to [action] so that [value/benefit].

I organized them roughly in the order the system will actually be used.

Xitique App — User-Centric User Stories

1. Authentication & Access

1. As a **collector**, I want to **log into the mobile app securely** so that **only authorized collectors can record deposits**.
 2. As a **system owner**, I want to **create collector accounts** so that **different collectors can use the system independently**.
 3. As a **collector**, I want to **remain logged in during the day** so that **I don't need to authenticate repeatedly while collecting deposits**.
 4. As a **collector**, I want to **log out of the system** so that **my account cannot be used by someone else if I lose my device**.
 5. As a **system owner**, I want to **control who can access the system** so that **unauthorized users cannot manipulate financial records**.
-

2. Ticante Registration

6. As a **collector**, I want to **register a new ticante** so that **they can start saving money with the Xitique system**.
7. As a **collector**, I want to **record the ticante's name** so that **I can identify them during collections**.
8. As a **collector**, I want to **assign a unique ID number to each ticante** so that **every participant can be uniquely tracked**.
9. As a **collector**, I want to **record the ticante's daily deposit amount** so that **the system knows how much they should save per day**.
10. As a **collector**, I want to **record the ticante's workplace or location (e.g., market)** so that **I can easily find them during daily collections**.

11. As a **collector**, I want to **save the GPS location of fixed ticantes** so that **their exact location can be remembered and verified**.
 12. As a **collector**, I want to **activate or deactivate a ticante** so that **I can stop tracking those who leave the program**.
-

3. Searching and Viewing Ticantes

13. As a **collector**, I want to **search for a ticante by name or ID** so that **I can quickly find their record during collection**.
 14. As a **collector**, I want to **see a list of all my ticantes** so that **I know who I need to visit each day**.
 15. As a **collector**, I want to **see the daily deposit value for each ticante** so that **I know how much they should pay**.
 16. As a **collector**, I want to **see the ticante's monthly progress** so that **I know how many days they have already deposited**.
-

4. Daily Deposit Collection

17. As a **collector**, I want to **record a deposit for a ticante** so that **their savings progress is updated**.
18. As a **collector**, I want to **record deposits covering multiple days** so that **ticantes can pay in advance if necessary**.
19. As a **collector**, I want to **record the exact amount deposited** so that **the system keeps an accurate financial record**.
20. As a **collector**, I want to **record the date of the deposit** so that **the system can calculate monthly totals correctly**.
21. As a **collector**, I want the system to **automatically calculate how many days the payment covers** so that **I don't need to do manual calculations**.
22. As a **collector**, I want the system to **prevent duplicate deposits for the same day** so that **errors are avoided**.
23. As a **collector**, I want to **see confirmation after saving a deposit** so that **I know the transaction was recorded successfully**.

5. Debt Management

- 24. As a **collector**, I want to **record when a ticante misses a deposit** so that **the system tracks their outstanding debt**.
- 25. As a **collector**, I want to **record partial payments toward debt** so that **the ticante's balance stays accurate**.
- 26. As a **collector**, I want to **see the total debt of a ticante** so that **I can remind them of their pending payments**.

6. Monthly Calculations

- 27. As a **collector**, I want the system to **automatically calculate the total saved by each ticante during the month** so that **I don't need to sum deposits manually**.
- 28. As a **collector**, I want the system to **automatically subtract the service fee (one day's deposit)** so that **the final payout is correct**.
- 29. As a **collector**, I want to **view the final amount each ticante will receive at the end of the month** so that **I can prepare the payout**.
- 30. As a **system owner**, I want to **generate monthly statements for all ticantes** so that **the savings records are transparent**.

7. Reports & Monitoring

- 31. As a **system owner**, I want to **see the total amount collected in a day** so that **I can monitor daily cash flow**.
- 32. As a **system owner**, I want to **see the total amount collected in a month** so that **I can analyze business performance**.
- 33. As a **system owner**, I want to **export financial reports** so that **records can be stored or audited externally**.
- 34. As a **system owner**, I want to **track the collector's activity logs** so that **fraud or mistakes can be detected**.
- 35. As a **system owner**, I want to **see the GPS location of deposit records** so that **I can confirm that collections occurred in the expected locations**.

8. Security and Audit

- 36. As a **system owner**, I want **every transaction to be logged** so that **no financial record can be secretly modified**.
- 37. As a **system owner**, I want to **see who created or modified each deposit record** so that **accountability is maintained**.
- 38. As a **system owner**, I want **automatic backups of system data** so that **financial records are never lost**.

9. Future Features (Mobile Expansion)

- 39. As a **ticante**, I want to **view my savings balance on a mobile app** so that **I can monitor my progress without asking the collector**.
- 40. As a **ticante**, I want to **receive notifications of recorded deposits** so that **I know my payment was registered correctly**.
- 41. As a **ticante**, I want to **make digital payments in the future** so that **I don't always need to pay in cash**.

10. Multi-Tenant (Commercial Version)

- 42. As a **new collector**, I want to **create my own account and manage my own ticanos** so that **I can run my own Xitique operation**.
- 43. As a **platform administrator**, I want to **separate data between collectors** so that **each collector only sees their own customers**.
- 44. As a **platform owner**, I want to **charge collectors for using the system** so that **the platform becomes a business**.

MVP User Stories (First Version)

For your **first working system**, only these are required:

- 1. Login / Authentication
- 2. Register ticante

3. List/search ticantes
4. Record deposit
5. Record multi-day deposits
6. Monthly total calculation
7. Daily collection report

Everything else can come later.
